

Civil Engineer Senior Project Manager (P.E. License Required)

Location: Cranbury, NJ

Whitman is currently seeking a Civil Engineer Senior Project Manager with 10 to 15 years of experience in Land Development (or Site Engineering) to work in our Cranbury, NJ office. The successful candidate shall be expected to manage a team of engineers in the Civil Engineering Division. The candidate will be required to prepare complete site plan documents for new development, provide testimony before local Planning/Zoning Boards, and prepare storm water calculations and detention basin designs. Additionally, the candidate shall be expected to write proposals, attend client meetings, prepare invoices and perform business development activities.

New Jersey Professional Engineering (PE) license is a requirement. AutoCAD/HydroCAD proficiency is a requirement. Minimum work experience of ten to fifteen (10-15) years required.

Responsibilities:

- The candidate shall be expected to write proposals, communicate with clients, attend client meetings, prepare invoices and perform business development activities.
- Serve as project manager/coordinator/mentor for staff of civil engineers.
- Prepare complete site plan documents for new development.
- Prepare storm water calculations and detention basin designs.
- Responsible for obtaining Municipal, County and NJDEP approvals/permitting.
- Provide testimony before local Planning/Zoning Boards.
- Prepare Bid Specifications.
- Responsible for the on-time delivery of quality documents that meet a client's needs for the project.
- Interact and coordinate with clients, subcontractors and regulatory agency staff.
- Be available to travel for work, approximately 3 to 5 days per month, usually in the northeast US.

Requirements:

- Bachelor's degree in Civil Engineering with 10 to 15 years of project experience.
- New Jersey Professional Engineering (PE) license required. PE licenses in additional states is a plus.
- Must be proficient in the use of AutoCAD/HydroCAD and Civil 3D.
- Geotechnical experience is a plus.
- Ability to meet fast-paced deadlines while maintaining quality documents.
- Must be capable of working individually and within a multi-discipline team environment.
- Must have strong verbal and technical writing skills and be able to present reports and presentations.
- Active involvement in industry-related societies is a plus.

About Whitman:

Whitman is a full-service environmental, engineering, energy, waste management and EH&S compliance consulting firm with our headquarters located in Cranbury, New Jersey. At Whitman you will find a positive and rewarding work environment, career challenges, and the opportunity to expand your knowledge of your field. We realize the value of hard work and commitment. That's why at Whitman, your extra effort is always noticed. Because we are a medium-sized firm, our staff works directly with the principals of the company and learns from their knowledge and experience. For some, they act as mentors and guide careers as they progress. All Whitman professional staff are given on the job training for new skills and are encouraged to attend professional seminars and to participate in the professional societies relating to the areas of their special skills. Whitman provides employment consideration to all applicants without regard to age, race, creed, color, national origin, ancestry, marital status, affectional or sexual orientation or gender. **For more information, visit www.whitmanco.com.**
